

Sapphire ATI Eyefinity Technology Benefits

Gaming - Immerse yourself in game play:

- Get a commanding view of the action, and enjoy more control in real-time strategy games.
- Detect enemies sooner, react faster, and survive longer in first-person-shooter games.
- See enemy aircraft with peripheral vision, and fly with greater spatial awareness in flight combat simulators.
- Eliminate blind spots and feel a heightened sense of speed in racing games.

Productivity - Helps you get more done:

- Optimize productivity by increasing PC desktop workspace with multiple high-resolution monitors.
- Manage multitasking more efficiently, and view more data, applications, and images at once.
- Avoid time-wasting application-switching, window-sorting, mouse-clicking, and scrolling.

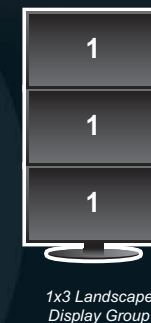

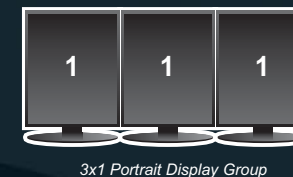

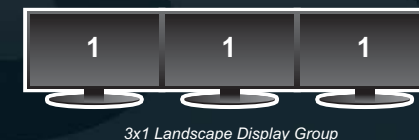

Entertainment - Maximize your leisure time:

- Group multiple monitors into a large integrated display surface for the ultimate wide-screen home theater display.
- View TV sports, movies, or video entertainment on one monitor while viewing online stats, Internet pages, or games on other displays.

Display Configurations

Sapphire ATI Eyefinity supports various Display Group combinations. For more combinations, visit <http://www.amd.com/us/products/technologies/eyefinity/Pages/eyefinity.aspx>

Display Combinations

The internal Sapphire ATI Eyefinity technology will support a maximum of three independent display outputs via a combination of two DVI, HDMI or VGA with one DisplayPort monitor.

Example configurations based on a graphics card with four display outputs are as follows:

	DVI Connector	DVI Connector	DP Connector	HDMI Connector
Example #1	Yes	Yes	Yes	No
Example #2	Yes	No	Yes	Yes
Example #3	No	Yes	Yes	Yes
